

## Need some help getting your Instant Profit Website (IPW) up and running?

Hi, Tim Brechbill here. I am an I.T. Professional with over 20 years of experience, and the developer and creator of your Instant Profit Website.

I can help you get your IPW up and running quickly. Keep in mind that I do all the work myself, personally, not anybody else. When I finish, your IPW site will be 100% ready to promote and make money.

## Package #1: A-Z

- New Domain – You must do the research to pick a new domain name. I recommend a .com address if you can find one that you like. You might consider seeing if “yourname”.com is available and you can start a personal blog there and add additional new domains later.
- New Hosting Account – You will finally have your own web host where you can add unlimited IPW sites at any time without any additional hosting costs.
- IPW Installation – I will install your Instant Profit Website on your selected domain as long as you purchase your hosting through my HostGator affiliate link that I provide below.
- Approximate costs: \$15.01 for the Domain and First Month Hosting, My Installation Fee: \$30.00. So the Total Out of Pocket Expense to get started would be ONLY \$45.01. Ongoing costs would be about \$10/month hosting and \$15/year for the domain which would both be paid to HostGator.

Here is what you do:

1. Signup for your domain and hosting here: [HostGator](#)

**(NOTE: You must use the HostGator link above so I receive credit or you will have to pay an additional \$60 for installation)**

2. On the HostGator page select "View Hosting Plans"
3. Register for the HostGator "Baby" plan.
4. Put your domain to transfer in the "I Currently Have a Domain Name" box or Enter your new domain that you want to purchase.
5. **IMPORTANT=>** Use my Coupon Code: "skadooglehost" you will get the 1st month for \$0.01.
6. Press "Continue to Step 2" - **NOTE:** If you get an error, you will have to re-enter the "skadooglehost" coupon code.
7. Enter your payment information.

After you complete your registration with HostGator, open a support ticket at <http://skadoogle.com/support> and provide me with the following information:

1. A complete copy of your welcome email from HostGator
2. Which Instant Profit Website you purchased (Baby Showers, Homeschooling, Coin Collecting, etc.)
3. Your Amazon.com, AdSense, and skaDoogle affiliate IDs ("N/A" if you don't have one)
4. Your State/Province and Country
5. Your desired Company Name and email address for the site

When I get the information and confirm you signed up thru my link I will send you a PayPal invoice for the \$30. After I receive payment, I will install your site, usually within 24 hours.

## Package #2: Installation on YOUR Host

- IPW Installation – I will install your Instant Profit Website on your selected domain, but I cannot guarantee your IPW site will work on your host unless it is one on my preferred list. If upon initial installation the IPW site you purchased will not work correctly, you must purchase Package #1 if you want any additional help.
- Approximate costs: \$10/yr for domain, **My Installation Fee: \$100** (includes 1 hour of troubleshooting).
  - **Note:** Many times it takes me more time to do an install on an existing host than a new one. That is why I strongly recommend Package #1 AND it is cheaper!
- If I have already installed for you on your host before, the charge would only be \$30 for each additional IPW site.
